

File I/O operations – *read, write, getattr, etc.*

pvfsHandle (H^{bar}) for “bar.txt” \leftarrow *SkyeFS_RESOLVE* (/a/b/bar.txt)

SkyeFS client uses the PVFS handle to issue a PVFS IO call (for data reads/writes, attribute reads)

PVFS_sys_IO (H^{bar} , ...)

```
sequenceDiagram
    participant Client
    participant Server
    Note over Client: PVFS_sys_IO (H^bar, ...)
    Client->>Server: 
    Server-->>Client: 
    Client->>Server: 
```
